About the Corridor

The Shattuck Avenue corridor is one of the few major corridors that cut diagonally across Alameda County, connecting BART stations, Berkeley and Oakland’s downtowns, and neighborhood shopping areas. While it has one of the lowest operating speeds among the major corridors, it carries a high number of passengers. Future corridor investments should seek to increase operating speeds to retain existing riders and attract new ones.

BY 2020: ENHANCED BUS
Bus service could be improved using Enhanced Bus components, including better traffic signals, sidewalk extensions, and priority treatments for transit. This would be a strategic first step in improving bus speed and reliability in this corridor.

BY 2040: ENHANCED BUS UPGRADES
In the future, technologies such as traffic signal equipment and transit signal priority will need updates. The long-term investment strategy would be to monitor where these upgrades will need to be refreshed or replaced as the technology advances.
