• You may only load and unload bikes at AC Transit bus stops.

• Space on the rack is available on a first come, first served basis. If the space is full, please wait for the next bus.

• Bike racks can accommodate two-wheeled bikes (no tandems) with a wheelbase of up to 44 inches and a wheel size of at least 16 inches.

• You must load and unload your own bike. The bus operator cannot provide assistance.

AC Transit buses (except Tempo) are equipped with front-mounted racks that can hold 2 or 3 bikes.

Bikes on TEMPO
• Bikes can be rolled on board through the rear doors and into a bike rack inside the bus. Please secure your bike in the rack. If the space is full, please wait for the next bus.

• Bike racks are available at some Tempo stations. Any bike left at a station for more than 72 hours will be sent to AC Transit’s Lost and Found.

Using Bike Racks

Loading
1. Signal to the operator that you want to load your bike. Make sure the operator sees you before stepping in front of the bus.

2. Squeeze and pull up on the bike rack handle to release the folded rack. Lower the rack until it clicks into place.

3. Lift your bike onto the rack, fitting the wheels into the slots labeled “front” and “rear.”

4. Raise the support arm over the top of the front tire. Do not lock your bike to the rack.

Unloading
1. Before exiting the bus, tell the operator you will be unloading your bike and exit through the front door.

2. Raise the support arm up and off the bike’s front tire, then lift and remove the bike from the rack.

3. If no other bike remains on the rack, squeeze the handle, then lift up and return the rack to its upright position.

4. Return to the curb with your bike as quickly as possible so the bus can proceed.

For a video of how to load your bike on the rack, visit actransit.org/bikes-buses

New MCI Buses:
Bikes can no longer be stored in the cargo bay. Use the three-position racks at the front of the bus.
Bus + Bike Riders

Get around the East Bay with ease by combining biking and AC Transit. Whether you are commuting to work, riding to school, or hitting the trails, we can help get you there.

No additional fare is required to load your bike onto the rack of an AC Transit bus.

To learn more about bikes on buses, or to watch our video about using bike racks, visit actransit.org/bikes-buses.

Sharing the Road

Communication is key to buses and bikes sharing the road safely. Bus operators are required to signal when pulling to the curb at bus stops. Listen for the signal sound of an overtaking bus, then signal and pass the bus on the left when clear. **Never pass between the bus and the curb.**

Tips for the multi-modal rider

AC Transit is not responsible for loss of or damage to bikes carried on buses. Keep an eye on your bike while on board. For lost bikes, submit a claim at actransit.org/lostandfound.
